CANDIDATE STATEMENT: Our role as educators is fundamental to OSU's mission, and this is a wonderful place to work and an exciting time. Delivering on our mission requires some extra effort by a subset of us to keep things functioning, and I have been willing to put in that extra time and effort at various times over my career including changes to the Bacc Core and our curricula. I want to work now at the EC level to help our organization since so many components of the university's mission are tied to Faculty Senate function.
