From Chrysanthemum Mattison:

Programs submit annual reports, but do not review course outcomes every year.

All courses should have Outcomes built-in to the course.

For sure, all DPD, WIC, Bac core courses outcomes are assessed annually.

All new courses submitted for consideration must submit an assessment plan.

Depending on program, all other courses are on a 5-7 year cycle for outcomes assessment.

Although courses may have the same outcomes, the method of assessment is left-up to the individual instructor/department. So, it is possible for any parallel course (face-to-face or online) to be assessed using a different method, but not a different outcome.
