Candidate Statement: This is a critical time for OSU with the inauguration of a new president, the rollout of a new Strategic Plan, and the economic upheaval that is impacting all of higher education. There are so many details to juggle, so many moving parts. Fortunately, I thrive on moving parts. I enjoy seeing how all parts of a system like OSU fit together and how they can work together better. I have done that in my time on the Executive Committee so far and look forward to continuing.
