

AI Usage Policy - Syllabus Minimum Requirements Policy
May 14, 2026 Faculty Senate Meeting

Note: The following draft [Syllabus Minimum Requirements Policy](#) proposes the addition of an AI usage policy to course syllabi. It is the result of work conducted by the Excellence in Teaching Committee and is provided to the Faculty Senate for discussion and consideration. This draft is not scheduled for a vote at the May 14, 2026 Faculty Senate meeting.

All course syllabi must include an AI usage policy, developed in accordance with university guidelines, that communicates expectations for student use of artificial intelligence. Determination of permitted or prohibited AI use remains at the discretion of the instructor.
