Subject: Re: Liaison with MIME regarding Aerospace Engineering Minor

Hi Robb,

Thanks so much for the confirmation. I'll send it along. And we'll be sure to let you know when the Minor is official, so you can start directing some of your cadets to it.

Best regards,

Brady

> We spoke with Nancy yesterday regarding the Aerospace Engineering minor and believe that it is a great idea. There is almost no overlap in curriculum as our curriculum covers more the Air Force (as an organization and processes) along with general leadership. As we discussed yesterday, we generally talk to at least a couple of students every year that want to attend OSU, but are interested in Aerospace Engineering. Please let us know if you need anything else from us.

>> Dear Lieutenant Owens, Captain Butler, and Captain McMullen,
>>

>> My name is Brady Gibbons, and I am the Associate School Head for Undergraduate Programs in the School of Mechanical, Industrial, and Manufacturing Engineering here at OSU. I'm writing to you because our faculty have identified a need and developed a path for our students to achieve a Minor degree in Aerospace Engineering. We've submitted this to the University Curriculum Committee and they have charged us with liaising with your program. I sincerely apologize of not doing this sooner. I've been working with Senior Instructor Nancy Squires and Associate Professor Roberto Albertani on this, and am cc'ing them here.

>>
>> I'm attaching two documents here for your review. One is the rationale for the minor, and the other is the request to create a course designator (AAE). We would greatly appreciate any comments you may have regarding our proposals. We feel they are quite distinct from your Aerospace Studies Minor, and also feel that many students in the AFROTC program that are also in MIME will be greatly benefitted by this degree.

>>
>> Please feel free to contact me with any questions or concerns you may have.
