Candidate Statement: During my time with OSU I have developed a deep respect for its land-grant mission to promote economic, social, cultural and environmental progress throughout Oregon and beyond. I believe that shared governance is the best avenue for striving to achieve this mission, and I will bring a dedication to both the model and the mission if elected. In addition to the relevant academic service experiences listed, I would bring a broad perspective to the Executive Committee based in a wide range of professional and life experiences in both academia and industry, natural and social sciences, and rural and urban communities.
