This proposal is ready for review by the Budgets and Fiscal Planning Committee.

Note: The University Space Committee evaluation will be added to the proposal once it is received. The position that had assessed the space needs of new degree/certificate program proposals has either been eliminated or has been merged with another position in Facility Services. Jean Duffett is no longer with the University. A request for the space evaluation report has been resubmitted by Academic Programs on behalf of the School of Psychological Science.

This proposal is being sent back by the Executive Committee of the Faculty Senate. We would like to see a liaison with the Statistics department. While we understand the advantages of a department offering an in-house version of a topic like Quantitative Methods, we have a responsibility to be sure that we are not duplicating instruction across departments. It would be especially helpful if you could indicate how your course differs from anything taught by Statistics. Thank you.

We have changed to the proposal to drop our two proposed Core Quantitative Methods classes (which focused on statistics) and one of the two Research Methods courses. Instead, we have added the ST 511/512/513 series. We have retained one PSY methods course. There are no changes to the overall number of credit hours required by the proposed degree or to the number of credit hours we require as part of our Methods Core.

We have changed the proposal in the following places:

- 1) The table specifying the specific classes required by the degree
- 2) The table containing an example of a degree path for a student
- 3) The paragraph in section 6d which outlines the yearly number of sections we would be required to teach. The new numbers reflect the fact that we replaced three proposed PSY classes with three ST classes.
