CANDIDATE STATEMENT: The last 12 years at Motor Pool have been transformative to my understanding of the research, academic, student support and public service contributions our University makes every day.

In addition to my listening style, I think the lens I would bring is of a University that is much larger than a campus in Corvallis with direct impacts everywhere.

I believe in service and I strongly believe in our mission.

I want to focus the remainder of my career in service to faculty and students supporting their access to the services and resources to succeed in an increasingly complex world.
