**CANDIDATE STATEMENT:** My service at Motor Pool has been transformative to my understanding of the research, academic, student support and public service contributions our University makes every day.

From my unique perspective I daily observe a University which makes direct impacts statewide and beyond, and I get to engage on a personal level with the individuals doing it. I want to represent these amazing people by serving on the Executive Committee. In particular, I want to listen and give a voice to professional faculty and ensure their interests are well served now and in the future.
