From: Michael Harte
Subj: Microbiology Action Plan Comments

I have search committee chair duties the Friday and am away overseas for the rest of the term – apologies.

As an internal reviewer for microbiology I wanted to forward my comments on the action plans:

- MB has comprehensively addressed the recommendations of the review team.
- MB has identified actions they can undertake and noted those that require actions from elsewhere (college level).
- The identification of short, medium, and longer term actions is to be welcomed and seems realistic.
- I remain concerned that the Department is still not receiving the support it needs from the two Colleges to remain successful, though MB has clearly identified what it can do absent continued/additional support.

Overall, MB should be commended for the thorough and thoughtful response to the review.

Cheers,

Michael
