Subject: NSE Course Designator Proposal

Richard and Prem,

We have received from the School of Nuclear Science and Engineering a request to establish a new course designator. The proposed **NSE** course designator follows the recently approved new School of **Nuclear Science and Engineering**.

<https://secure.oregonstate.edu/ap/cps/proposals/view/93925>

While not explicitly stated in the proposal, the conversion of the existing courses to the new course designator will involve the termination of the **NE**, **RHP**, and **MP** course designators.

In addition to preparing and submitting an expedited new course CPS proposal on behalf of the School, APAA will also submit separate proposals to terminate the existing course designators—assuming approval of the new NSE course designator by the Curriculum Council.

Please note that Kathryn Higley, the School Director, responded to the various questions in a summary, paragraph form rather than the traditional mode of listing the question and then providing a response. Since the Curriculum Council is the only review and approval step for new course designators, and the questions have been provided with a response, I did not send the proposal back for any revisions. I have also attached the latest version of the request for a new course designator proposal form.

Rebecca has indicated that the NSE course is available for use.
