

The syllabus needs the verbatim statement, "This course satisfies the Baccalaureate Core WIC requirement for students majoring in xxx."

The syllabus needs to be specific about how each WIC learning outcome is integrated and assessed in the course. It is recommend that the outcomes matrix included in the survey be incorporated into the syllabus so that students are clear about outcomes and assessments.

The syllabus needs to discuss critical thinking in the discipline as it appears in the course (required of all Baccalaureate Core courses).

The biggest problem is that students only revise 1000 words of the final paper. In all WIC courses, students must revise 2000 words after receiving feedback on the draft.
